# E-Safety Policy

## Introduction

As part of the Every Child Matters agenda set out by the government, the Education Act 2002 and the Children's Act 2004, it is the duty of all organisations to ensure that children and young people are protected from potential harm both within and beyond the school environment. Therefore, the involvement of children, young people and parent/carers is also vital to the successful use of online technologies.

## Aims

This policy aims to explain how parents/carers, children or young people can be a part of these safeguarding procedures. It also details how children and young people are educated to be safe and responsible users capable of making good judgements about what they see, find and use. The term 'E-Safety' is used to encompass the safe use of all technologies in order to protect children, young people and adults from potential and known risks.

- To emphasise the need to educate staff, children and young people about the pros and cons of using new technologies both within and outside the organisation.
- To provide safeguards and agreement for acceptable use to guide all users, whether staff or children and young people, in their online experiences.
- To ensure adults are clear about procedures for misuse of any technologies both within and beyond the boundaries of the organisation.
- To develop links with parents/carers and the wider community ensuring input into policies and procedures with continued awareness of the benefits and potential issues related to technologies.

## Roles and Responsibilities

The responsibility of managing E-Safety can be demanding and challenging, and must therefore be appointed at managerial/committee level to personnel who are available when we are operational.
